

H1 HALOGEN BULBS

- *One of the best assortments available!*
- *Quality made to industry standards*
- *For uniform brightness and optimum performance, we recommend replacing your bulbs in pairs*

For off-road use only. Bulb Care: Do not handle the glass part of a halogen bulb. The oil from your hands or any other residue on the glass can cause the bulb to burn out prematurely. If you accidentally touch the glass, clean it immediately with isopropyl alcohol and a lint-free cloth.

H2 REPLACEMENT HALOGEN BULB

- *Great as a spare!*
- *Quality made to industry standards*
- *Replaces original bulb perfectly; however, may have a higher Wattage for greater illumination and driving safety*

For uniform brightness and optimum performance, we recommend replacing your bulbs in pairs. For off-road use only. Bulb Care: Do not handle the glass part of a halogen bulb. The oil from your hands or any other residue on the glass can cause the bulb to burn out prematurely. If you accidentally touch the glass, clean it immediately with isopropyl alcohol and a lint-free cloth.

H3 HALOGEN BULBS

- *Quality made to industry standards*
- *For uniform brightness and optimum performance, we recommend replacing your bulbs in pairs*

For off-road use only. Bulb Care: Do not handle the glass part of a halogen bulb. The oil from your hands or any other residue on the glass can cause the bulb to burn out prematurely. If you accidentally touch the glass, clean it immediately with isopropyl alcohol and a lint-free cloth.

H4 HALOGEN BULBS

- *H4 bulbs can replace 9003 bulbs*
- *Quality made to industry standards*
- *For uniform brightness and optimum performance, we recommend replacing your bulbs in pairs*

For off-road use only except (A) which meet DOT requirements. Bulb Care: Do not handle the glass part of a halogen bulb. The oil from your hands or any other residue on the glass can cause the bulb to burn out prematurely. If you accidentally touch the glass, clean it immediately with isopropyl alcohol and a lint-free cloth. Watts indicated for High Beam/Low Beam.

H7 HALOGEN BULBS

- *Quality made to industry standards*
- *For uniform brightness and optimum performance, we recommend replacing your bulbs in pairs*

For off-road use only except (A) which meet DOT requirements. Bulb Care: Do not handle the glass part of a halogen bulb. The oil from your hands or any other residue on the glass can cause the bulb to burn out prematurely. If you accidentally touch the glass, clean it immediately with isopropyl alcohol and a lint-free cloth.

NOTE: These bulbs are intended for off-road use only and may not be legal for street use. Please consult your owner's manual for proper bulb size, type and watts.

PREMIUM UPGRADE BULBS

Free Shipping!

- Colored glass bulbs for longer-lasting original color than painted-color bulbs
- Before ordering, check owner's manual or base of bulb for type of bulb needed

BLUE LASER® HIGH-POWER H-3 AND H-4 BULBS

- Special coating filters light output to produce a distinctive blue glow
- For off-road use only

Brilliant blue-white lighting. Bulbs are direct replacements for existing H-3 and H-4 bulbs. For safety reasons, we recommend replacing bulbs in pairs to ensure uniform brightness. H-3 bulbs available in 130-, 100- or 55-watts. H-4 bulbs available in 130/90- or 60/55-watts.

BRIGHT #1157 HALOGEN BULB

- *50% brighter than normal #1157 bulbs!*
- *Replaces standard #1157 turn signal, parking and back-up bulbs*

Easy, affordable way to safer, more secure driving. High-power 30-watt/8-watt dual-filament halogen bulb.

HIGH-POWER 130-WATT H-3 QUARTZ-HALOGEN BULB

Produces much more illumination (even with older lights) for greater driving safety. Bulb draws 11 amps. For off-road use only.

OFF-ROAD H-4 QUARTZ-HALOGEN BULB

- *Fits all standard H-4 headlamps*

Dual-element bulbs are ideal for off-road vehicles, boats, anywhere maximum brightness is a must! Choose 90/130-Watt bulb or 80/100-Watt bulb. Single or double heavy-duty headlight relays also available. **NOTE:** For off-road use only. May require heavy-duty relay.

PLASMA PREMIUM UPGRADE HEADLIGHT BULB

- *Super White premium upgrade bulb replaces OEM bulb 9006*
- *Simulate HID output*

The best performing bulb on the market. **NOTE:** These bulbs are intended for off-road use only and may not be legal for street use. Please consult your owner's manual for proper bulb size, type and watts.

ROTATING AND FLASHING RED LED #1157 BULB

Free Shipping!

- *4 times brighter than any other #1157 bulb!*
- *As a taillight, LEDs light up in sequence to simulate rotation ("rotation" reverses every 2 seconds)!*
- *As a brake light, LEDs flash simultaneously over 2 times per second when you press brake pedal!*

Make your car, truck or motorcycle more visible! The 12 built-in clear LEDs turn brilliant red when illuminated. Replace your standard #1157 (or European P21/5W) bulb with this bulb. Works with any 2-bulb system and is a must with clear taillight lenses. Low current draw ensures extra-long bulb life. Not designed to replace turn-signal bulb. For off-road and show use only.
